Relation between sea-ice variation in the Sea of Okhotsk and Arctic Oscillation

18 mm

Title: Times New Roman, Bold-face, 14-point, and Center

Charlie F. BROWN[1], Taro AOKI[2] and Kai MOMBETSU[3]

Author(s): 12-point font and center

[1] *Geophysical Institute, University of Alaska, Alaska, USA*
[2] *Institute of Low Temperature Science, Hokkaido University, Sapporo, Japan*
[3] *Mombetsu Oceanography Institute, Mombetsu, Japan*

Affiliation(s): Affiliation, City, State or Province, Country using an italic 10.5-point font
(Left-justified with appropriate space, no postal code and no E-mail Address)

2 character-space

Abstract (Head:11 pt., bold; Body text: 10.5 pt.)

A short abstract (50 to 100 words) in a single paragraph should be included here. The paragraph needs the space of 4 characters at left and right sides. In this sample paper, we describe the formatting guidelines for submissions to the Proceedings of the International Symposium on Okhotsk Sea & Sea Ice. For a simple way, download a template from the web, and insert your information to the template. (10.5-point font)

Key words: sea ice, global warming, Arctic Oscillation (Head: 11 pt., words: 10.5-pt. font)

List up 3 to 5 keywords for library indexing and online searching.

1. Introduction

The body of the paper begins with the Introduction.

Following the Introduction, a typical text should be organized into sections that describe the **method,** the **observation data**, the **result and discussion**, and the **conclusions. Acknowledgments** (where applicable) and **references** follow the Conclusions.

A conference paper should not exceed 4 pages.

2. Formattng

2.1 Text Style

Text must be single-spaced using a Times New Roman font, or Time. The fonts are as follows:

Title: 14-point, Bold

Author (s): 12-point with affiliation number1 (Superscript)

(See the example)

Affiliation(s): 10-point, Italic

Use a 14-point font for the Title, a 12-point font for Author Name(s), an italic 10-point font for Affiliation(s), a 11-point font for all Section and Subsection Heads, and a 10.5-point font for all body text. Text in the columns must be full justified.

2.2 Paper Title

The paper title with Times Roman or Times New Roman, bold-faced in 14-point font should be centered in upper and lower case at the location shown and two lines may be used.

2.3 Author Name(s)

Author names in 12 point font should consist of first name, middle name and the last name with superscript number of affiliation, and centered.

2.4 Affiliation(s)

The numbered Affiliation(s) should be left-justified with proper spaces (5-15) using an italic 10-point font. Do not include street address, postal code, email or fax numbers.

3. Chapter and section

Headings and subheadings appear throughout the text to divide the subject matter into logical parts and emphasize major elements. Numbering can be used for Chapter (1, 2, ..) and Section (1.1, 1.2, …). Only initial of the title is in capital letter and others are in small letters except proper nouns (palace, human, some abbreviation like SAR etc.), as "**3. Observations in the Sea of Okhotsk"**.

3.1 Chapter Heads

Chapter heads should be in upright bold 11pt font, as "**1. Introduction**".

3.2 Section heads

Section Heads should be in ***italic*** Bold 11pt font, as "***2.1 Observations in the Sea of Okhotsk***".

3.3 Last page

The two columns on the last page should be as close to equal length as possible, which is usually done by MS-Word.

25 mm

4. Tables and figures

4.1 Tables

Table format is as shown here. Tables should be numbered consecutively. When referring to a table, use table numbers as Table 1, Tables 2~3,... .

Table 1. Margins of pages. This instruction is in this form.

	Left Column	Right Column
Top margin	30 mm*	
Side margin	18 mm from left edge	18 mm from right edge
Column width	19.55 characters	19.55 characters
Space of columns	1.77 characters	
Bottom margin	25 mm	

*The unit should use SI unit in principle.

4.2 Equations

Equations are to be numbered. When referring in a sentence, refer them as "Eq. 1" or "Eqs. 5-7". When referring at sentence head, refer as "Equation 1".

$$Q_M = (1\text{-}a)\, I + Q_{RL} + Q_A + Q_E + Q_P + Q_G \quad (1)$$

$$Q_E = k_E V_1 (T_1 - T_0) \quad (2)$$

(The **variables** use ***italic*** type, and the **additional characters** and **figures** use **solid** type as Q_M.)

4.3 Figures

Number figures consecutively and use the figure number. When referring them in a text sentence, refer them as "Fig. 1" or "Figs. 2~3". When referring at sentence head, refer as "Figure 1". Figures must have a caption as below.

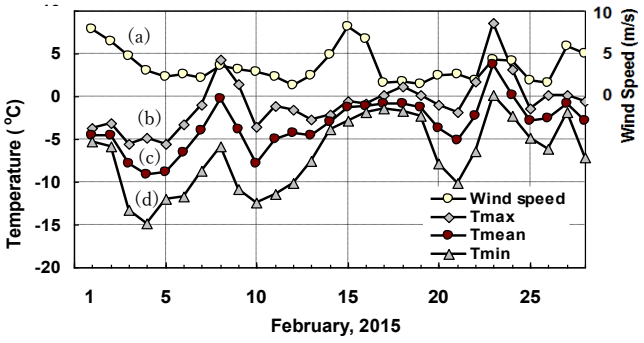

Fig. 1 Meteorological conditions of Mombetsu on February, 2015. (a) is daily mean wind speed. (b), (c) and (d) are daily maximum, mean, minimum temperatures respectively.
(10-point font)

In a printed Proceedings, graphics will be in **black and white**, but they will be in color on web site. Please be aware of the quality of your figures, illustrations, and photos.

5. Conclusions

A summary of your research results should be included in this section toward the end of the paper.

Acknowledgements

Acknowledgements may be made to those individuals or institutions that made an important contribution.

References

References to original (not secondary) sources for cited material is to be listed together at the end of the paper. References should be published materials accessible to the public. Internal technical reports may be cited only if they are easily accessible to the public. Private communications should be acknowledged within text, not referenced.

List of References shall be arranged in alphabetical order of family name of the first- author for articles with more than one author.

For more than 4 authors, the authors should be presented as "Vuille, M. and 6 others (2008)", which should be referred as (Vuille and others, 2008).

Journals, conference proceedings and titles of books, should be in italics.

Examples are:
